Journal of Microscopy

Patron: HER MAJESTY THE QUEEN

Officers and Council 1989–90

President: GILLIAN BULLOCK

Vice-Presidents: B. BRACEGIRDLE
J. R. GARRETT

Vice-President and International Secretary: M. J. GORINGE

Executive Hon. Secretary: C. HAMMOND

Hon. Treasurer: G. A. D. BRIGGS

Hon. Secretary (Education): N. G. WRIGLEY

Hon. Secretary (Science): H. Y. ELDER

Ordinary Members of Council:

D. E. ASHHURST
J. E. BEESLEY
S. BRADBURY
L. M. BROWN
J. N. CHAPMAN
D. J. GOLDSTEIN
C. R. M. GROVENOR
M. G. ORMEROD
T. F. PAGE
P. C. ROBINSON
D. M. SHOTTON

Hon. Joint Editors:

C. V. HOWARD
R. M. GLAESER
P. ECHLIN
D. C. JOY
K. M. KNOWLES

Administrator: P. HIRST

Authorization to photocopy for internal or personal use or the internal or personal use of specific clients is granted by The Royal Microscopical Society for libraries and other users registered with the Copyright Clearance Centre (CCC) Transactional Reporting Service, provided that the stated base fee of $05.00 per copy is paid directly to the CCC, 27 Congress Street, Salem, MA 01970, U.S.A. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Special requests should be addressed to the Editor. 0022-2720/90 $05.00.

Contents of Vol. 157

Part 1

Editorial 1

M. Bertero, P. Boccacci, G. J. Brakenhoff, F. Malfanti and H. T. M. van der Voort. Three-dimensional image restoration and super-resolution in fluorescence confocal microscopy 3

K. Carlsson. Scanning and detection techniques used in a confocal scanning laser microscope 21

Seth R. Goldstein, Thomas Hubin, Scott Rosenthal and Clayton Washburn. A confocal video rate laser beam scanning reflected light microscope with no moving parts 29

A. Boyde, S. J. Jones, M. L. Taylor, L. A. Wolfe and T. F. Watson. Fluorescence in the tandem scanning microscope 39

Timothy F. Watson. The application of real-time confocal microscopy to the study of high-speed dental-bur–tooth-cutting interactions 51

Donna J. Arndt-Jovin, Michel Robert-Nicoud and Thomas M. Jovin. Probing DNA structure and function with a multi-wavelength fluorescence confocal laser microscope 61

Jan G. J. Bauman, Jan A. Bayer and Herman van Dekken. Fluorescent *in-situ* hybridization to detect cellular RNA by flow cytometry and confocal microscopy 73

D. J. Rawlins and P. J. Shaw. Localization of ribosomal and telomeric DNA sequences in intact plant nuclei by *in-situ* hybridization and three-dimensional optical microscopy 83

Jany Vassy, Jean Paul Rigaut, Anne-Marie Hill and Jean Foucrier. Analysis by confocal scanning laser microscopy imaging of the spatial distribution of intermediate filaments in foetal and adult rat liver cells 91

A. Knoester and G. J. Brakenhoff. Applications of confocal microscopy in industrial solid materials: some examples and a first evaluation 105

Cph. Bron, Ph. Gremillet, D. Launay, M. Jourlin, H. P. Gautschi, Th. Bächi and J. Schüpbach. Three-dimensional electron microscopy of entire cells 115

W. Beil and I. C. Carlsen. A combination of topographical contrast and stereoscopy for the reconstruction of surface topographies in SEM 127

Part 2

Invited Review.
ALICE WARLEY. Standards for the application of X-ray microanalysis to biological specimens 135

A. ODGAARD, E. B. JENSEN and H. J. G. GUNDERSEN. Estimation of structural anisotropy based on volume orientation. A new concept 149

S. F. SROCZYŃSKI. Methods for obtaining high quality stereoscopic images of microscopic objects 163

L. GALASSI. Fluorescence discrimination in a reflecting environment 181

J. M. CARAZO, F. F. RIVERA, E. L. ZAPATA, M. RADERMACHER and J. FRANK. Fuzzy-sets-based classification of electron microscopy images of biological macromolecules with an application to ribosomal particles 187

R. A. HOROWITZ, P. J. GIANNASCA and C. L. WOODCOCK. Ultrastructural preservation of nuclei and chromatin: improvement with low-temperature methods 205

C. D. OCKLEFORD. A quantitative interference light microscope study of human first trimester chorionic villi 225

W. LIOU. Whole-mount preparations of mouse lens epithelium for the fluorescent cytological study of actin 239

HANS-JURGEN AUGUST and JOHANN WERNISCH. Theoretical prediction of the electron backscattering coefficient for multilayer structures 247

Book Review 255

Part 3

Editorial 257

SETSUYA FUJITA. Morphogenesis of the brain as studied by 3-D computer graphics simulation 259

DAVID L. FELTEN, SUZANNE Y. FELTEN, JOHN R. SLADEK, JR, MARY D. NOTTER, SONIA L. CARLSON, DENISE L. BELLINGER and STANLEY J. WIEGAND. Fluorescence histochemical techniques for catecholamines as tools in neurobiology 271

H. BRAENDGAARD, S. M. EVANS, C. V. HOWARD and H. J. G. GUNDERSEN. The total number of neurons in the human neocortex unbiasedly estimated using optical disectors 285

LARS ERIKSSON, MAGNUS DAHLBOM and LENNART WIDÉN. Positron emission tomography—a new technique for studies of the central nervous system 305

K.-H. WIEDERHOLD and J. M. PALACIOS. Receptor autoradiography and 2-deoxyglucose techniques in neuroscience 335

PETER AHRENS, AXEL SCHLEICHER, KARL ZILLES and LISA WERNER. Image analysis of Nissl-stained neuronal perikarya in the primary visual cortex of the rat: automatic detection and segmentation of neuronal profiles with nuclei and nucleoli 349

AXEL SCHLEICHER and KARL ZILLES. A quantitative approach to cytoarchitectonics: analysis of structural inhomogeneities in nervous tissue using an image analyser 367
